

# VALLARASU S

## Full Stack Mern Developer

### CAREER OBJECTIVE

---

As a passionate and detail-oriented Full Stack MERN Developer, and web development I aim to leverage my skills in MongoDB, Express.js, React.js, and Node.js to contribute to innovative web development projects. Eager to join a forward-thinking organization where I can continuously learn, solve real-world problems, and grow into a seasoned professional while delivering scalable and efficient solutions.

### PROJECTS

---

1. RAPIDO CLONE (MY CREATIVE EXPERIENCE)
  - Built a responsive clone of the Rapido bike taxi booking platform using HTML, CSS3, JavaScript, jQuery, and Bootstrap. The project replicates key features such as ride booking UI, fare estimates, location input, and responsive layouts. Focused on clean design and mobile-first responsiveness to enhance user experience. This project demonstrates my creativity, attention to detail, and front-end development skills
2. BLOG SITE PLATFORM
  - Developed a comprehensive full-stack blogging platform using the MERN stack. The platform features user authentication (login/signup), blog posting, and image uploads. Users can search and filter blog posts **and** search images via an integrated image API, with the option to download images directly from the platform. Data is securely stored in database and the platform is fully responsive, providing an optimal experience on all devices.
  - Technologies used: React.js, Html , CSS3, JavaScript , Node.js, Express.js ,MongoDb.
